## The Midstream Solution

# The advantages of using RYALITI's Biomimetic AI Platform to move your business forward intelligently

## Al in the Age of Digital Transformation

- "Nearly 80% of oil and gas executives said they 'agree or strongly agree' that Al will significantly change the way their companies do business in the next five years."
  - PwC's 22nd Annual Global CEO Survey

#### Why Al for Midstream?

Al is currently being used across the Midstream value chain as a solution to help track the movement of high-value oil and gas assets. Also, Al for autonomous pipeline inspection is another state-of-the-art Midstream solution that brings crucial intelligence to the edge.

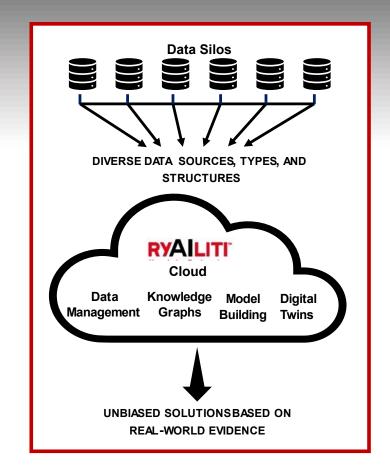

The Midstream's daily struggle is their inability to make timely decisions and responses to pricing volatility. They want to make purchase contract decisions on a more pro-active basis without putting their company at significant risk.

## Why RYA LITI?

- The RYAILITI cloud empowers Midstream companies to better assess risks and navigate change through dynamic scenario analysis
- Our platform solves real-world challenges delivering dynamic responses to complex changes in your business environment
- We helps Midstream companies curtail revenue leakage and cost escalation by addressing their upstream and downstream challenges.
- RYALITI delivers advanced analytics that helps Midstream leadership determine their most efficient system operation, configuration, and product flows
  - This includes tailgate products and how the mix of products should be combined to maximize profit for both the plant operations and their clients.

#### **How its Done**

- RYAILITI's Knowledge Engineering Engine leverages biological methods and principles drawn from emerging research to address real-world complexities and navigate change.
- Using historical data and simulations of processes allows Midstream companies to be better prepared for the challenges faced in today's energy transitions.

## What do we need from your Team?

- Your ELT's commitment and knowledge inputs, working with our Subject Matter Experts (SMEs) and technical teams
- Specific data from your operation
  - Producer Contracts and Production
  - SCADA Plant and Field
  - KPIs
  - Tailgate and Pipeline Contracts
- The solution can be generic or specific to your business case needs
