RYAILITI™

Pharmacovigilance
– safety and efficacy –

The "Challenge"

Pharmacovigilance teams work tirelessly to improve patient safety through drug design. These teams interpret complex information from multiple sources including adverse drug reactions data to other sources associated with improving drug safety.

The "Solution"

RYAILITI's innovative knowledge engineering platform overcomes siloed data without the need to cleanse, normalize, or integrate delivering groundbreaking and insightful results, removing data challenges while increasing efficiencies and mitigating bias saving time and money before moving to a "real-world" environment
