

# The Clean Tech Market

## The "Pain"

As requirements for renewable energy continue to grow due to expanding domestic use, increased electric vehicle uptake, and industrial transition – siloed and disparate data sources have made real-time analytics and decision-making difficult, significant changes need to be made

## The "Solution"

Game-changing AI complexity and causality technology from RYAILITI addresses the astronomic complexities of Clean Energy markets such as Renewable Energy Facilities, Natural Gas and more, removing pain points while increasing efficiencies and mitigating bias in scenario analysis
